COVID-19 – Even long, dark tunnels have Light at the End

These are exceptional and extraordinary times, and, although RBI is working within the guidelines laid down by Government, our office remains open and we are here to help get you ready to be back to work as soon as you are able.

Understandably there are restrictions and challenges, but please do not stop sending us your requests as we will do our level best to fulfil every one.

A note in regards to the PPE that we are offering. These items have been sourced responsibly and only from our own reputable suppliers. (along with certification if needed) We have also ensured that the items we hold are not reducing the supply for medical staff, who so desperately need them in their fight against this awful virus.

From all of us here to you, your families and colleagues – stay safe and healthy – this will end and when it does, we will be ready.

Much love

The system has 9 essential steps and guarantees a longer lasting result.

Why switch to the MediHeel Pedicure System?

At Elim we realized that not all clients have identical pedicure needs. We designed a system that focuses on compromised areas but not leaving the relaxing experience behind.

The system was designed to give you a long-lasting result on the feet, focussing on the dry area around the heel, hydrating nails and nourishing cuticles. There are also alternatives for bacterial infections, fungal infections on the nail and yellowing nails.

Overall a superior approach to pedicures with products containing facial grade ingredients.
