Get the most of your Day Beauty Routine with the New Cellular Balancing Water

The specific Cellular Balancing Water formula instantly balances pH levels, optimally preparing skin for the subsequently applied skincare products in the beauty program. It also tightens pores, evens out skin tone and soothes irritation.

Combining the benefits of marine iodine, sun-kissed fruits, honey and wild flowers from the shores of the Mediterranean Sea to the highest peaks of the "Vallée des Merveilles and Fontanalba", the skincare line "Lys de Fontanalba" is enriched with a liposome complex associating the moisturizing and anti-oxidant properties of the Martagon Lily with those of the White Lily, which help soften, purify and beautify the skin. Encapsulated in a liposome, these extracts are released gradually for maximum beauty results.
