Moss of the Isles believe that everyone has a story to tell, and their story is one of heritage and a life-long commitment to conscious well-being.

They are three international luxury spa and wellness experts, innovators, creatives, and veterans of the global wellness industry. They are also great friends. Separately they dreamed of creating MOSS of the ISLES. They each wanted to contribute something beautiful to the evolution and awareness of holistic wellbeing.

But there was a moment in their collaboration - between testing ideas and exchanging notes and knowledge – when they realised their combined stories were greater than they were alone. Alchemy, they quickly discovered, exists not only in the creation but also in the coming together of its creators. MOSS of the ISLES was conceived and shaped by their passion and drive to source ethical, sustainable and effective ingredients that would create beautiful, nurturing and healing products.

Understanding and harnessing the synergy of essential oils and extracts have allowed them to create a line of products that they believe embraces holistic wellness, healthful aging, and connection, while keeping an ever mindful eye on their environmental impact. It was important for them to match the purity of quality with purity of intent.

Espe Pillow Mist

Coola

COOLA - THE GREAT BARRIER CREAM™ FORTIFYING MOISTURIZER

Harness the healing powers of the sea for more resilient, hydrated skin. Sustainably harvested in the coastal waters of California, our Sea Kelp actives are rich in essential nutrients and polyphenols, while Blue Algae is rich in amino acids, fatty acids, antioxidants, and proteins. We combined these resilient marine actives with our Full Spectrum 360° complex to create this lightweight organic cream that reinforces your skin's natural barrier to help fight modern-day skin aggressors.

Barrier-breaking COOLA Organic Skincare Collection

A More Beautiful Healthy™ begins with a healthy skin barrier. It's your skin's first line of protection—keeping moisture and nutrients in and modern-day environmental and digital stressors out.

Acqua di Parma

SMART HOME DIFFUSER that combines design and home-automation technology in an entirely innovative way, developed by GamFratesi, a multi-award-winning pair of designers.

The diffuser can be filled with any of the House's nine blends such as Luce di Colonia, Buongiorno, Arancia di Capri, Fico d'Amalfi. Everything is entirely customizable. The leather finishes come in five different shades and are designed to be easily changed. The diffuser is designed so that you can select the desired fragrance at any moment. What makes the Smart Home Diffuser entirely unique is its sophisticated technology to program and diffuse the fragrances.

The device holds up to 3 fragrances that can be chosen remotely by setting the time and day of the week when you want it to be diffused. Each fragrance refill contains a smart recognition system that is read by the device. The fragrance extends through the air up to 30m sq. Each scented refill has an average duration of 60 hours with medium intensity use.

The device is wireless, which means it can be placed in any room in the home. Extremely flexible, the Smart Home Diffuser can be connected via Wi-Fi to an online system that manages all the information and updates. It can be commanded both manually using the push buttons on the base, via mobile phone with a web app, or via desktop by accessing a dedicated web-based platform.
